

HENOSIS

TREES TO MUSHROOMS CHART

Upcycle logs*, stumps, and wood chips** with gourmet and medicinal mushrooms.

We will plug any mushroom (wood dependent) for \$2.95/sq ft. A 48x4in log would be \$12.87 and would provide mushrooms for up to 2-4 years.

Stumps can last for 3-7 years each providing several pounds of mushrooms over their lifespan while decomposing the wood into nutrient rich compost.

If you have wood chips, we can inoculate them with wine cap mushrooms for you to use as mulch in your garden or landscape. 4x8x.5 ft bed (Cubic yard of chips) is \$160 and can be expanded indefinitely to prolong mushroom harvest and inoculate other areas in your yard.

For free estimates contact david@henosismushrooms.com, call 615-456-1192 or visit us at henosismushrooms.com.
